

09:00-11:00	National Centre of Competence in Cancer – progress meeting
	COFFEE BREAK
11:30-11:45	The development of molecular surgery in ovarian cancer. Is it ready for prime time?
11:45-12:00	Systemic treatment for ovarian carcinoma - 2023 update
12:00-12:15	PARP inhibitors in ovarian cancer – the current landscape and future perspective
12:15-12:30	The promise of genetic testing in ovarian cancer
12:30-12:45	
12:45-13:00	Radical surgery in ovarian cancer
13:00-13:15	Pelvic fistulae in gynaecologic oncology surgery
13:15-13:30	Intraoperative and postoperative complications in gynaecologic oncology
	LUNCH BREAK
14:30-14:45	Present and contradictory trends in breast cancer surgery
14:45-15:00	More than breast conserving treatment: oncoplastic surgery
15:00-15:15	Milestones in alloplastic breast reconstruction
15:15-15:30	B-lite prepec: simply the best!
15:30-15:45	Ultrasound guided localisation techniques in breast cancer management
15:45-16:00	Evidence based treatment of early stage breast cancer
16:00-16:15	The indications and techniques of axillary lymph node dissections in breast cancer
	COFFEE BREAK
16:45-17:00	Artificial intelligence (AI) – the new member of the multidisciplinary team for breast cancer treatment
17:00-17:15	The indications for systemic neoadjuvant treatment in breast cancer
17:15-17:30	Current indications for radiotherapy after breast cancer surgery
17:30-17:45	Distribution of BRCA 1 and 2 pathogenic mutations in Romania

17:45-18:00	Modern Strategies in neoadjuvant treatment of triple negative breast cancer
18:00-18:15	15 years oncoplasty: Lessons learned

DAY 2

09:00-09:15	Specific systemic treatments in advanced cervical cancer: from theory to practice
09:15-09:30	Why surgery is still done after radiotherapy in locally advanced cervical cancer in Romania?
09:30-09:45	New opportunities for immunotherapy in cervical cancer - dream or reality?
09:45-10:00	Quality indicators: What factors contribute to the excellence of cervix cancer treatment?
10:00-10:15	Reconfiguring therapeutic approach in endometrial cancer
10:15-10:30	Sentinel node biopsy in endometrial cancer – from literature to clinical practice
10:30-10:45	Update in the multidisciplinary treatment of vulvar cancer
10:45-11:00	Rare cancers of the genital area: neuroendocrine tumors and melanomas – clinical cases and advances
	COFFEE BREAK
11:30-11:45	Standardized care and quality control in medicine. The DKG accreditation of the Breast Tumor Centre from IOCN
11:45-12:00	Breast cancer, BRCA mutations and oncofertility. Institute of Oncology Prof. Dr. Ion Chiricuta experience
12:00-12:15	The clinical value of the intrinsic molecular subtypes of breast cancer
12:15-12:30	The role of microRNAs in response of breast cancer patients to neoadjuvant therapy
12:30-12:45	DIEP Flap Breast Reconstruction: How we do it!
12:45-13:00	Polyurethane Breast Reconstruction: The Good, The Bad and the Ugly
13:00-13:15	Hereditary breast and ovarian cancer – when, who and why we should test?
13:15-13:30	Li-Fraumeni syndrome – a not so rare cause of hereditary breast cancer – case series
13:30-13:45	Cowden syndrome – a rare cause of hereditary breast cancer – case report

	LUNCH BREAK
14:45-15:00	Managing abnormal results in the primary HPV screening of the preinvasive lesions of the cervix
15:00-15:15	Integrating the HPV testing in the cervical cancer screening – the IOCN experience
15:15-15:30	Prophylactic surgeries in gynaecological cancers
15:30-15:45	How to increase primary prevention in cervical cancer?
