## Motivation Letter

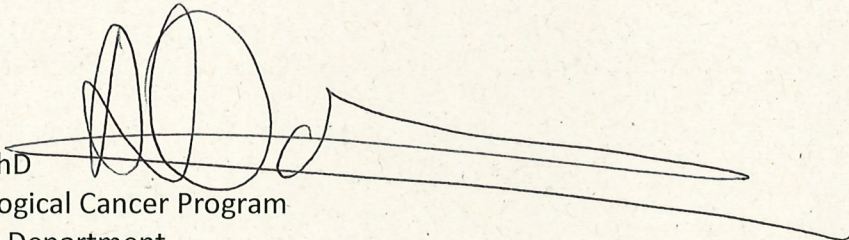

The key feature of the ESGO society is to gather the backbone specialty in Gynecologic patients' care, the Surgical discipline alongside the Medical Oncology approach under the same umbrella with a common aim, to improve long-term outcomes for those patients diagnosed with Gynecological Malignancies and for this main reason I want to be part of those who carry the umbrella. To disseminate and to bring the latest Gyn medical information to all members of the Gyn Community in Europe and across the world is the ESGO mission and I want to work to make this mission a reality.

I as medical oncology have developed my career based on two pillars: take care of my patients every day and keep my medical education at the highest level. As a result of this, I have been fortunate and have had the chance to be involved in the most relevant, practice changing studies and being part having an active role of the most prestigious oncology medical associations as ESMO, ASCO. Indeed, I have been actively involved in the last few years as ESMO Faculty in the GYN Track. This position has allowed me to identify and implement the best ways to build an attractive academic Gyn program and on top to meet esteemed colleagues.

I think my experience in academy and in the organization of International Meeting may favorably contribute to the ESGO Society. I expect to work very closely with all the ESGO Council members to learn from them and at the same time, to share my former experience to make ESGO a great success.

Thank you in advance for your time.

Best regards,

  
Ana Oaknin MD PhD  
Head of Gynaecological Cancer Program  
Medical Oncology Department  
Vall d'Hebron University Hospital  
Vall d'Hebron Institute of Oncology (VHIO)  
P. Vall d'Hebron 119-129  
08035 Barcelona
