

Motivation letter

Dear ESGO council board,

I would love with pleasure to apply for the ESGO council nominations (chair for the rest of the world or non-European member).

I have been working for more than a decade closely with ESGO, passed the ESGO exam in its first version in Athens, attending all conferences, masterclasses and workshops, having the honor to work actively in many ESGO committees and working groups (gender equality group and ESGO guidelines for low resources setting group, ESGO accredited centers consortium).

I had the privilege to have my center in Mansoura to be the first ESGO credit center in Africa and Arab World and propagating sincerely for ESGO activities with faith.

Being the general secretary and one of the founders of the Egyptian gynecology society (EGOS), pan Arabian society of gynecological oncology (PARSGO) steering committee member and a board member of the middle east and Mediterranean association of gynecological oncology (MEMAGO).

I have been working hard on education activities and on building bridges in between all interested specialties on the region with ESGO and the whole world.

Being from a different background and geographically close to Europe, I believe if I have the honor to be elected in the council that I would work with all my friends in ESGO for the sake of gynecological oncology education, research and patients welfare in Europe and the whole world.

Basel Refky Abdel Fattah Ahmed, MD, MRCS, EBSQ
European Board of Surgical Oncology
Associate professor of Surgical Oncology
Oncology Center, Mansoura University, Egypt
