Advanced Techniques in Gynaecological Oncology Surgery September 18, 2025 ONLINE SESSION + September 26, 2025 HANDS-ON TRAINING VALENCIA, SPAIN

## PELIMINARY SCIENTIFIC PROGRAMME

Online Sessions: September 18, 2025 Hands-on: September 16, 2025

Chair: Santiago Domingo Faculty: Victor Lago, Pablo Padilla, Marta Arnáez

## 1<sup>st</sup> Day, September 18, 2025 Online part of the course

| 16:00 - 16:10                           | Introduction to the workshop   | Santiago Domingo |
|---|--|------------------|
|   |  |                  |
| Colorectal surg                         | gery in Gynecology Oncology  |                  |
|   |  |                  |
| 16:10 - 16:30                           | Technique and standardization of the bowel anastomosis, stoma and bowel repair |                  |
| 16:30-16:50                             | Risk factors of anastomosis leakage in<br>ovarian cancer                       | Victor Lago      |
| 16:50-17:10                             | Follow up of the bowel surgery   |                  |
| 17:10-17:30                             | Practical cases  |                  |
|   | gery in Gynecology Oncology  |                  |
| 17:30-17:50                             | Ureteral and bladder repair. Different scenarios.                              |                  |
| 17:50-18:10                             | Urinary diversion and post op. management                                      |                  |
| 18:10-18:30                             | Management of complications  |                  |
| Vascular surgery in Gynecology Oncology |  |                  |
| 18:30-18:45                             | Principles of vascular repair. Surgical Instrumentation                        |                  |
| 18:45-19:00                             | intra and post op. Management.   |                  |
| 19:00-19:20                             | practical cases. Tips and tricks.  |                  |

## 2<sup>nd</sup> Day, September 26, 2025 Hands-on session Location: University hospital La Fe, Ground Floor, Tower A

| General information and rules of the laboratory use   Vascular anatomy: LEER procedure   09:00 -13:30 BOWEL SURGERY   Each block is based on a video interactive explanation of the procedure (scheme + video) followed by hands-on in animal model   09:00-11:30 1st Block: hand-sewn suturing   Theoretical and Video Session   Anastomosis side to side (Hand sewn)   Anastomosis end to end (Hand sewn)   11:30-12:00 Coffee Break   12:00-13:00 2nd Block: Stoma formation   Theoretical and Video Session   Ghost ileostomy   Diverting ileostomy   End Colostomy   Anastomosis side to side (Stapler)   Anastomosis end to end (Stapler)   Anastomosis end to end (Stapler)   13:30-14:30 Lunch   14:30 - 17:30 UROLOGIC SURGERY  |              |   |                         |
|--|--------------|---|-------------------------|
| Iaboratory use   Vascular anatomy: LEER procedure   09:00 -13:30 BOWEL SURGERY   Each block is based on a video interactive explanation of the procedure (scheme + video) followed by hands-on in animal model   09:00-11:30 1st Block: hand-sewn suturing   09:00-11:30 1st Block: stoma formation   Anastomosis end to end (Hand sewn) Anastomosis end to end (Hand sewn)   11:30-12:00 Coffee Break   12:00-13:00 2nd Block: Stoma formation   Theoretical and Video Session Ghost ileostomy   Diverting ileostomy End Colostomy   Bioverting ileostomy Strade Session   Anastomosis side to side (Stapler) Anastomosis side to side (Stapler)   Anastomosis side to side (Stapler) Anastomosis end to end (Stapler)   13:30-14:30 Lunch   14:30 - 17:30 UROLOGIC SURGERY   4th Block: Ureteric repair and reconstruction: Econstruction:   | 08:30-09:15  | Welcome and presentation                  |                         |
